

D1101FV FINGERPRINT 50 FLUSH-MOUNT

IP VIDEO DOOR STATION

Compact Edition
Fingerprint Reader Module • 1 Call Button

ANSWER YOUR DOOR ANYWHERE.

ADVANTAGES

HOW DOES IT WORK?

Imagine, you are not at home and your children have locked themselves out or the courier wants to deliver a parcel. With DoorBird this is no longer a problem. Every time someone rings the doorbell you will get a push notification on your smartphone or tablet. Via the DoorBird App you can talk to visitors and also see them live in HD quality. You will never miss a visitor again. With DoorBird you are on the move and yet at home, even if a burglar rings at the door to check if someone is at home.

SMART HOME STARTS AT THE FRONT DOOR

DoorBird is the smart solution for your house entrance. Simply connect your DoorBird IP Video Door Station to your smartphone and talk to your visitor – anywhere you are. The IP Video Door Station can be used as a stand-alone unit or can be integrated into an existing Smart Home platform. Even existing classic installations such as an electric door opener can still be used and controlled via the DoorBird App.

QUALITY MADE IN GERMANY

All DoorBird products are designed, developed and produced by Bird Home Automation Group in Berlin, Germany. We manufacture all products with the greatest care and precision, and deliver them to our customers all over the world.

Open API

 Local interface for integration with third-party systems and SIP

Video and audio call

 On smartphones, tablets (iOS, Android), IP and landline phones (SIP)

Smart Transmission Mode (STM)

 Real-time audio / video communication, optimized for mobile devices via WiFi, 3G, 4G, 5G

Smart Home & NVR compatible

 Control4, Loxone, Crestron, Synology, AVM FRITZ!Fon, URC, QNAP, RTI, ELAN, Fibaro, Bang & Olufsen and others

Microphone

· Clear voice transmission

Automatic door buzzer

 For use in medical offices and office environments

 Ultra wide-angle, hemispheric lens, 180°

4D Motion sensor with 4D technology

 Distance up to 6 m (19.7 ft) adjustable via App (interval: 1 m/3.3 ft)

Free visitor history

 Store still images for free, optional video recording available

Light sensor

· For night vision mode

Noise reduction and echo cancellation (AEC, ANR)

Individual action schedules, e.g.:

- Switch relay 1 for automatic door release Mo-Fr from 9 am until 4 pm when the call button is pressed
- 4D motion sensor switches on external lamp between 9 pm and 6 am

One freely configurable bistable latching relay

- Control one door or one gate via App
- Status configurable via App: temporary or permanent circuit

Easy connection to the network

 Connection via a network cable or bell wire via 2-Wire Ethernet PoE Converter "DooBird A1071" (PoE, network data)

Geofencing

Automatic door and gate opening when returning home

Easy self-install

 Quick installation via QR code scan

WiFi enabled

 Works within a WiFi network, no LAN cable needed

IR Night vision

· With Infrared LEDs

Call button

· With backlit nameplate

Fingerprint reader

- Supported number of fingerprints: 50
- · Status LED (RGB)
- · Touch sensor

BIOMETRIC IDENTIFICATION WITH A HUMAN TOUCH

DoorBird cooperates only with the best of its class: Our fingerprint reader is equipped with the technology of Fingerprint Cards AB (Fingerprints™) - the world's leading biometrics company, with its roots in Sweden. Fingerprints™ technology is found in hundreds of millions of devices and applications, and is used billions of times every day, providing safe and convenient identification and authentication with a human touch.

The solution by DoorBird brings together superior biometric performance and security, high standard of quality components and a capacitive touch sensor for our IP door stations and IP access control units.

REMOTE CONFIGURATION

The enrollment of a new fingerprint is done comfortably via App or our web-based dashboard available at https://webadmin.doorbird.com. A fingerprint can also be deleted remotely in real-time in case the access has to be revoked.

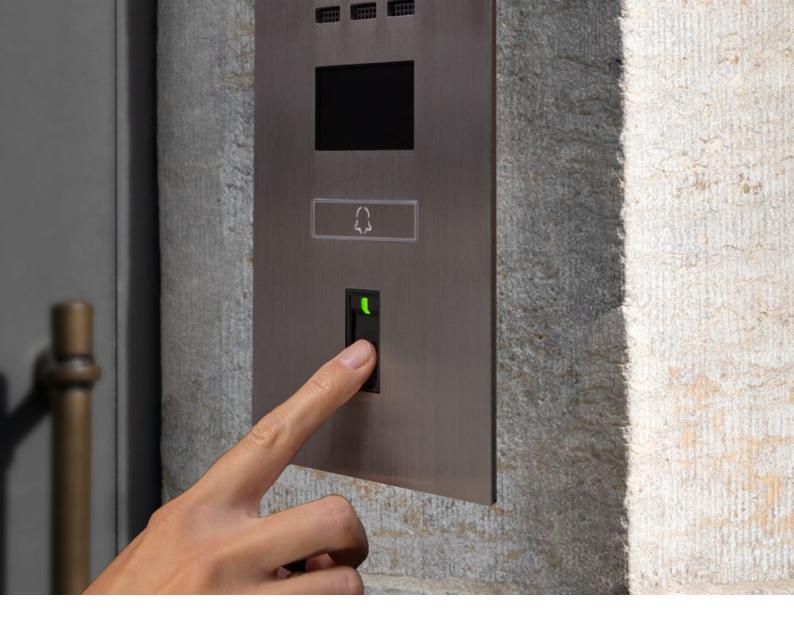

Using our fingerprint reader, you can restrict access authorization to specific days and times. This way, you determine who can enter your home or building and when. You can also define individually per fingerprint which action should be executed, e.g. trigger relay 1 or relay 2, trigger an IP I/O door controller, call a HTTP(s) URL, arm or disarm an alarm system, open a smart lock or trigger a building automation system event.

WEATHERPROOF SENSOR

Our fingerprint reader is especially designed for areas exposed to strong outdoor weather conditions, e.g. heat and cold, and does not lose its functionality. To ensure error-free detection, the sensor surface must be dry and clean. The touch sensor is effectively superior to line-based readers in terms of security, comfort and speed, and it also allows a lower installation height.

DATA-PRIVACY AND SECURITY

The reader does not store any fingerprint images. It stores only one template per fingerprint in form of a mathematically calculated hash value. Biometric features are not transmitted to the DoorBird Door Station, the app or the cloud. Thus, our system meets the highest data protection and data security standards.

In addition, the fingerprint reader has a locking mechanism which prevents attempts at manipulation, temporarily locking the system after multiple unauthorized access attempts. To increase the security even more, the fingerprint reader has no built-in relays. Instead, you can securely release a detached relay with the DoorBird I/O Door Controller A1081, which is connected to a DoorBird IP Video Door Station.

FINGERPRINT READER FEATURES

- · Touch sensor
- · Configurable via App or web-based dashboard
- · Status LED (RGB)
- Fully integrated into DoorBird IP Video Door Stations
- 1,000 times more secure than a 4-digit keypad PIN code
- · Manipulation prevention system
- · Event history with time stamp
- No more misplaced, forgotten, lost or stolen keys possible
- No unauthorized use of PIN codes or RFID key fobs possible, a fingerprint is unique per person
- · Personalized time frames and actions
- Supported number of fingerprints (template storage): 50
- Compatible with DoorBird IP Video Door Stations of the D21x and D11x series

TECHNICAL SPECIFICATIONS

GENERAL		CURRENT SYSTEM
Front panel	3 mm (0.12 in), Available in brushed stainless steel V2A / V4A and with Bronze-Finish, V4A	
Mounting housing (backbox)	Stainless steel	System requirements
Mounting type	Flush-mounted, surface-mounted version sold separately	
Call button	Illuminated	Recommended
Nameplate	Plastic see www.doorbird.com/buy	installation height
	Configurable via App	VIDEO
	 Individual events (e.g. switch a relay, HTTP(s) request) Individual schedules 50 fingerprints manageable Event history 	Lens
	Multicolored Status LED	Night vision
	· Normal mode:	AUDIO
	-Green + success sound: successfully authenticated -Red + error sound: unrecognized fingerprint	Audio components
Fingerprint Reader Module 50	(e.g. unknown fingerprint or wet touch sensor field - dry it with a tissue)	Audio streaming
	-Pink: Manipulation prevention (too many failed attempts, locked out for min. 30	NETWORK
	seconds)	Ethernet
	 Enrollment mode: Blue: wait for finger to touch 	WiFi
	-Green + no sound: scan step successful -Green + success sound: entire scan step successful (enrollment done) -LED goes off: Timeout during enrollment	Supported protocols
	·Start-up mode:	MOTION SENSOR
	-Yellow: Hardware test successful -Red: Hardware test not successful (broken)	Туре
Power supply	15 V DC (max. 15 W) or Power over Ethernet (PoE 802.3af Mode-A)	Detection angle
 Weight	785 g	Range
vveigitt	• LAN/PoE (T+, T-, R+, R-)	Technology
Connectors	Bistable latching relay, max. 1-24 V DC/AC, 1 A, e.g. for electric door opener External input for external door opener button 15 V DC input (+, -), max. 15 W Relays can be expanded / detached with DoorBird I/O Door Controller	Configuration
Weatherproof	Yes, IP65	
Approvals	IP65, CE, FCC, IC, RoHS, REACH, IEC/EN 62368, IEC/EN 62471, Wi-Fi CERTIFIED™	INTEGRATED WIF
Dimensions	213,4 x 85 x 32 mm (H x W x D) 6.77 x 3.35 x 1.26 in (H x W x D)	WiFi
Operating conditions	-25 to +55°C / -13 to 131°F	Biuetootii
	Humidity 10 to 85 % RH (non-condensing)	Sensor
Scope of delivery	1x Main Electrical Unit	THIRD-PARTY IN
	1x Front panel 1x Flush-mounting housing (backbox)	Partner integrations
	1x Power supply unit (mains adaptor) with 4 country-specific outlet adaptors	API
	(110 - 240 V AC to 15 V DC) 1x RJ45 adapter	Simultaneous video streams
	1x Screwdriver	OPTIONAL ACCES
	1x Quickstart guide with Digital Passport 1x Installation manual 1x Small parts	Sold separately
	see www.doorbird.com/warranty	

CUDDENT CYCTEM B	
CURRENT SYSTEM R	EQUIREMENTS
	Mobile device: Newest iOS on iPhone/iPad, newest Android on Smartphone/Tablet
System requirements	Internet: High-Speed Landline Broadband Internet connection, DSL, cable or fiber optic, no socks or proxy server
	Network: Ethernet Network, with DHCP
Recommended installation height	Camera lens should be at a min. height of 145 cm (57 in). Before the installation please determine your optimal installation height.
VIDEO	
Camera	HDTV 1080p, dynamic (VGA - HDTV)
Lens	High-end ultra wide-angle hemispheric lens 180° (D), 150° (H), 82° (V), straightened, IR-capable
Night vision	Yes, light sensor, automatic IR-cut filter, Infrared LEDs (850 nm)
AUDIO	
Audio components	Speaker and microphone, noise reduction and echo cancellation (ANR, AEC)
Audio streaming	Two-way, full duplex
NETWORK	
Ethernet	PoE 802.3af Mode-A, 10/100 Base-T
WiFi	2.4 GHz b/g/n
Supported protocols	HTTP, HTTPS, SSL/TLS, Bonjour, DNS, RTSP, RTP, TCP, UDP, RTCP, ICMP, DHCP, ARP, SIP, DTMF (RTP [RFC-2833], SIP INFO [RFC-2976]), STM
MOTION SENSOR	
Туре	Active
Detection angle	80° (H), 50° (V)
Range	1 - 6 m (3.3 - 19.7 ft), depends on environment, configurable in 1 m (3.3 ft) steps.
