ISO 9001
Cert. n° 0957/1

Larghezza anta (mm)	Peso massimo per singola anta (kg)	
	TEN	BIS O-V
min. 650	100	120
700	100	120
800	100	120
900	80	110
1000	70	110
1100	60	100
1200	/	100 (*)
1300	/	90 (*)
1400	/	80 (*)

(*) Aggiungere il terzo carrello sull'anta.

Attenzione: nel caso di verniciatura, i profili devono essere chiusi per evitare che lo spessore della vernice provochi un cattivo funzionamento. Non verniciare la guida a pavimento in alluminio.

Attenzione: l'altezza massima delle ante mobili sfondabili (HM) non deve superare 2400 mm.

1. MONTAGGIO DEL SISTEMA A SFONDAMENTO AST

- 1.1 (Tav. 422) In base al senso di sfondamento e alla lunghezza LM dell'anta, tagliare a misura i profili [1] e [2] come indicato nelle liste di taglio.
- 1.2 (Tav. 426) Montare gli scontri [30] dell'anta fissa.
- 1.3 (Tav. 423) Passare il perno [4] nel foro del piatto [3] e bloccare l'accoppiamento con la spina [17] inserita fino al dritto del piatto [3]; mettere in sede la spina 8 e montare la testatina con la vite [18] sul piatto [3].
- 1.4 (Tav. 424) Infilare il perno [4] così assemblato nel profilo [2] e fissare il tutto all'anta con le viti [31] e [19] in dotazione. *Attenzione al senso di sfondamento.*
- 1.5 (Tav. 424) Assemblare lo scrocco [7] e passarlo nel profilo [2]; (tav. 421) la forza di sfondamento dell'anta si regola spostando lo scrocco [7] lungo il profilo [2] e comprimendo la molla agendo sull'apposita vite ad esagono incassata da 4 mm.
- 1.6 (Tav. 422) Montare il perno inferiore [6] sull'anta con le viti [16].
- 1.7 (Tav. 425) Passare il profilo [1] nel braccio [5] e fissarlo con le viti a testa svasata [20] in dotazione.
- 1.8 Infilare l'insieme così montato nel perno [4], montare la calotta di copertura [10], passare la rondella forata [11] nella spina [8] incastrandola anche sulla calotta [10], chiudere i profili e bloccare il tutto con la vite [21]; montare le testatine di plastica [12] e [13] sui profili [1] e [2].
- 1.9 (Tav.426) Sull'anta fissa, dal lato del vano passaggio, montare con le viti in dotazione gli scontri [30], il microinterruttore di prossimità [26] e gli inserti [24] e [25] per la battuta dell'anta mobile.
- 1.10 (Tav. 426) Unire la cornice perimetrale con le staffe [23] e le viti in dotazione e fissarvi gli incontri superiori [22] dell'anta fissa.
- 1.11 (Tav. 426) Inserire il magnete [28] nell'incontro superiore [22] dell'anta fissa, in prossimità del vano di passaggio.
- 1.12 Montare sull'anta fissa e sul profilo verticale della cornice perimetrale le cerniere [27]. *Attenzione al senso di sfondamento.*
- 1.13 Fissare a pavimento l'incontro inferiore [29] dell'anta fissa con le viti in dotazione.

2. FISSAGGIO GUIDE A PAVIMENTO (tav. 421)

- 2.1 Tagliare a misura la guida [15] come indicato nelle liste di taglio. Fissare la guida [15] e le testine [14] direttamente a pavimento per tutta la lunghezza della corsa in apertura dell'anta, davanti al serramento fisso.

3. KIT SERRATURA (tav. 429)

E' possibile installare sul profilo la serratura a chiave per il bloccaggio del serramento completo (funzione notte).

Attenzione: per garantire la sicurezza di funzionamento, deve essere installata l'asta blocco anta inferiore (non di nostra fornitura) come indicato nel particolare di Tav. 429.

4. COLLEGAMENTI ELETTRICI SISTEMA AST

Vedi manuale di installazione IP1628 - AST/ASME/ASMI.

Wing width mm	Max weight one single wing kg	
	TEN	BIS O-V
min. 650	100	120
700	100	120
800	100	120
900	80	110
1000	70	110
1100	60	100
1200	/	100 (*)
1300	/	90 (*)
1400	/	80 (*)

(*) Add the third carriage on the wing.

Attention: In the case of painting, the sections must be closed so as to prevent paint layer from causing any system malfunction.

Do not paint the aluminium guide on the floor.

Attention: break-out mobile wings (HM) should not exceed 2400 mm in height.

1. INSTALLATION OF AST PANIC DEVICE

- 1.1 (Tav. 422) Cut sections [1] and [2] to size as specified in cutting tables according to the break-through direction and the length, LM, of the wing.
- 1.2 (Tav. 426) Fit the strikers [30] of the fixed wing.
- 1.3 (Tav. 423) Insert the pin [4] in the hole of plate [3] and secure the coupling by means of dowel [17] straight away of the plate [3]; place the dowel [8] in its seat and attach the headpiece to plate [3] by means of screw [18].
- 1.4 (Tav. 424) Insert the pin [4] thus mounted into section [2] and secure to the wing by means of the screws [31] and [19] provided. *Pay utmost attention to break-through direction.*
- 1.5 (Tav. 424) Assemble the latch [7] and fit it into section [2]; (tav. 421) the force required to break through the wing can be adjusted by moving the latch [7] along section [2] and compressing the spring by means of the appropriate 4 mm socket hexagonal-head screw.
- 1.6 (Tav. 422) Fit the lower pin [6] on the wing and secure it by means of the screws [16] provided.
- 1.7 (Tav. 425) Insert section [1] into arm [5] and secure by means of the flathead screws [20] provided.
- 1.8 Insert the parts thus assembled into pin [4] and fit on the cover [10]. Insert the perforated washer [11] into dowel [8] also fitting it into cover [10], close the profile and secure by means of screw [21]. Finally, fit plastic headpieces [13] on to sections [1] and [2].
- 1.9 (Tav.426) Fit on the strikers [30], the proximity microswitch [26], and inserts [24] and [25] for the mobile wing rabbet on to the fixed wing on the passageway side by means of the screws provided.
- 1.10 (Tav. 426) Fit the edge frame by means of the brackets [23] and the screws provided and secure to it the top receivers [22] of the fixed wing.
- 1.11 (Tav. 426) Insert magnet [28] into the top receiver [22] of the fixed wing in proximity to the passageway.
- 1.12 Fit the hinges [27] to the fixed wing and to the vertical section of the edge frame. *Pay utmost attention to break-through direction.*
- 1.13 Secure the lower receiver [29] of the fixed wing to the floor by means of the screws provided.

2. SECURING THE GUIDEWAYS TO THE FLOOR (tav. 421)

- 2.1 Cut guide [15] to size as shown in the cutting tables. Secure the guideway [15] and heads [14] directly to the floor along the full length of wing opening travel, in front of the fixed casing.

3. LOCK KIT (tav. 429)

Key lock may be fitted to the section for completely locking the door (night function).

Attention: for maximum operating safety it is necessary that the lower wing lock rod (not supplied by us) be installed as outlined in the detail of Tav. 429.

4. ELECTRICAL CONNECTIONS AST DEVICE

See the IP1628 – AST/ASME/ASMI installation manual.

1400	/	80 (*)

(*) Drittes Rollgestell hinzufügen

Achtung: Wenn die Profile lackiert werden, müssen sie geschlossen werden, damit es nicht durch die Lackschicht zu einer Betriebsstörung kommt. Die Aluminium-Führungsschiene am Boden nicht beschichten.

Achtung: Die Türen mit Schwenk-Aus-Beschlägen (HM) dürfen eine max. Höhe von 2.400 mm nicht überschreiten.

1. MONTAGE DU SYSTEME D'ENFONCEMENT AST

- 1.1 (Tav. 422) Selon le sens d'enfoulement et la longueur LM du vantail, couper à mesure les profilés [1] et [2] comme l'indiquent les listes de coupe.
- 1.2 (Tav. 426) Monter les butées [30] du vantail fixe.
- 1.3 (Tav. 423) Faire passer l'axe [4] dans le trou de la plaque [3] et bloquer la liaison avec la goupille [17] enfoncee jusqu'au plaque [3]; mettre en place la goupille 8 et monter la tête avec la vis [18] sur la plaque [3].
- 1.4 (Tav. 424) Introduire l'axe [4] ainsi assemblé dans le profilé [2] et fixer le tout sur le vantail avec les vis [31] et [19] fournies.
Attention au sens d'enfoulement.
- 1.5 (Tav. 424) Assembler la gâchette [7] et la faire passer dans le profilé [2]; (tav. 421) la force d'enfoulement du vantail se règle en déplaçant la gâchette [7] le long du profilé [2] et en comprimant le ressort à l'aide de la vis hexacave de 4 mm prévue à cet effet.
- 1.6 (Tav. 422) Monter l'axe inférieur [6] sur le vantail avec les vis coniques [16] fournies.
- 1.7 (Tav. 425) Faire passer le profilé [1] dans le bras [5] et le fixer avec les vis coniques [20] fournies.
- 1.8 Enfiler l'ensemble ainsi monté dans l'axe [4], monter le capot [10], faire passer la rondelle percée [11] dans la goupille [8] en l'encastrant également sur le capot [10] fermer les profils et bloquer le tout avec la vis [21]; monter les têtes en plastique [13] sur les profilés [1] et [2].
- 1.9 (Tav. 426) Sur le vantail fixe, du côté de l'ouverture de passage, monter, avec les vis fournies, les butées [30], le microinterrupteur de proximité [26] et les inserts [24] et [25] pour la butée du vantail mobile.
- 1.10 (Tav. 426) Unir le cadre périphérique avec les étriers [23] et les vis fournies et y fixer les gâches supérieures [22] du vantail fixe.
- 1.11 (Tav. 426) Insérer l'aimant [28] dans la gâche supérieure [22] du vantail fixe, à proximité de l'ouverture de passage.
- 1.12 Monter les charnières [27] sur le vantail fixe et sur le profilé vertical du cadre. *Attention au sens d'enfoulement.*
- 1.13 Fixer au sol la gâche inférieure [29] du vantail fixe avec les vis fournies.

2. FIXATION DES RAILS AU SOL (tav. 421)

- 2.1 Couper à mesure le rail [15] comme indiqué sur les listes de coupe. Fixer le rail [15] et les têtes [14] directement au sol sur toute la longueur de la course du vantail, devant le châssis fixe.

3. KIT SERRURE (tav. 429)

Il est possible d'installer sur le profilé de serrure à clé pour bloquer le châssis complet (fonction «nuit»).

Attention: afin de garantir la sécurité de fonctionnement, installer la tige de blocage de la porte inférieure (non fournie) de la façon indiquée dans le détail de la Tav. 429.

4. LIAISON ELECTRIQUES DES SYSTEME AST

Voir manuel d'installation IP1628 - AST/ASME/ASMI.

1. MONTAGE DES EINDRÜCKSYSTEMS AST

- 1.1 (Tav. 422) Je nach Eindrückrichtung und je nach Länge LM des Türflügels die Profile [1] und [2] auf Maß wie in der Zuschnittsliste zuschneiden.
- 1.2 (Tav. 426) Die Klinken [30] des festen Türflügels montieren.
- 1.3 (Tav. 423) Den Zapfen [4] durch die Bohrung des Tellers [3] führen und die Verbindung mit dem Stift [17] den Sie bis zur Außenseite des Tellers [3] schieben; den Stift [8] in den Sitz fügen und die Abdeckkappe mit der Schraube [18] auf dem Teller [3] befestigen.
- 1.4 (Tav. 424) Den im Profil [2] eingebauten Zapfen [4] einfügen und das Ganze an den Türflügel mit den mitgelieferten Schrauben [31] und [19] befestigen. *Auf die Eindrückrichtung achten.*
- 1.5 (Tav. 424) Die Klinke [7] montieren und durch das Profil [2] führen (tav. 421); die Eindrückkraft des Türflügels wird durch die Verschiebung der Klinke [7] entlang des Profils [2] und durch Kompression der Feder der entsprechenden Sechskantschraube 4 mm eingestellt.
- 1.6 (Tav. 422) Den unteren Zapfen [6] auf das Türflügel montieren und mit den mitgelieferten Schrauben [16] festziehen.
- 1.7 (Tav. 425) Das Profil [1] durch den Hebel [5] schieben und mit den mitgelieferten Senkschrauben [20] festziehen.
- 1.8 Das Ganze in das Profil [4] einschieben, die Abdeckkappe [10] montieren, die gelochte Unterlegscheibe [11] auf den Stift [8] schieben, indem sie auch auf der Kappe [10] befestigt wird, Profile schließen und das Ganze mit der Schraube [21] fixieren; die Kunststoffkappen [13] auf die Profile [1] und [2] montieren.
- 1.9 (Tav. 426) Die Klinken [30], den Berührungsmitkroschalter [26] und die Einsätze [24] und [25] für den Anschlag des beweglichen Türflügels mit den mitgelieferten Schrauben auf den festen Türenflügel auf der Durchgangsseite montieren.
- 1.10 (Tav. 426) Den Rahmen mit den Bügeln [23] und den mitgelieferten Schrauben verbinden und die oberen Anschläge [22] des festen Türflügels daran anschließen.
- 1.11 (Tav. 426) Den Magneten [28] des oberen Anschlags [22] des festen Türenflügels in der Nähe des Durchgangs einfügen.
- 1.12 Die Bänder [27] auf den festen Türflügel und auf das vertikale Profil des Rahmens befestigen [27]. *Auf die Eindrückrichtung achten.*
- 1.13 Den unteren Anschlag [29] des festen Türflügels mit den mitgelieferten Schrauben am Boden befestigen.

2. BEFESTIGUNG DER BODENSCHIENEN (tav. 421)

- 2.1 Schienen [15] auf das gewünschte Maß zuschneiden, wie in den Zuschnittslisten angegeben. Die Schienen [15] und die Magnetköpfe [14] direkt am Boden über die gesamte Länge der Öffnungsbewegung des Türflügels, vor dem festen Beschlag, montieren.

3. SCHLÖSSER (tav. 429)

Es ist möglich, auf dem Profil Schlösser zu installieren, die mit einem Schlüssel den gesamten Beschlag verschließen (Nachtfunktion).

Achtung: Um die Funktionssicherheit zu garantieren, muß die untere Stange zur Blockierung des Flügels installiert werden (nicht im Lieferumfang enthalten), wie in Tav. 429 dargestellt.

4. STROMANSCHLÜSSE DES SYSTEMS AST

Siehe Installationsanweisung IP1628 – AST/ASME/ASMI.

1400	/	80 (*)

(*) Adicionar o terceiro carro na folha.

Atenção: em caso de pintura, os perfis devem ser fechados para evitar que a espessura da tinta provoque um péssimo funcionamento.

Não pintar a guia a pavimento de alumínio.

Atenção: a altura máxima das folhas móveis da porta anti-pânico (HM) não deve superar 2400 mm.

1. MONTAJE DEL SISTEMA DE DESFONDE AST

- 1.1 (Tav. 422) En base al sentido de desfonde y a la longitud LM de la hoja, cortar a la medida los perfiles [1] y [2], como se indica en las listas de corte.
- 1.2 (Tav. 426) Montar los topes [30] de la hoja fija
- 1.3 (Tav. 423) Pasar el perno [4] por el agujero de la placa [3] y bloquear el acoplamiento con la clavija [17] introducida hasta el recto de la placa [3]; luego colocar la misma en su alojamiento [8] y montar la cabeza con el tornillo [18] en la placa [3].
- 1.4 (Tav. 424) Ensartar el perno [4] así ensamblado en el perfil [2] y fijar el conjunto a la hoja con los tornillos [31] y [19] que se suministran. *Prestar atención al sentido de desfonde.*
- 1.5 (Tav. 424) Ensamblar la gacheta [7] y pasársela por el perfil [2]; (tav. 421) la fuerza de desfonde de la hoja se regula desplazando la gacheta [7] a lo largo del perfil [2] y comprimiendo el resorte actuando sobre el tornillo cilíndrico con hexágono hembra de 4 mm.
- 1.6 (Tav. 422) Montar el perno inferior [6] en la hoja con los tornillos [16] que se suministran.
- 1.7 (Tav. 425) Pasar el perfil [1] por el brazo [5] y fijarlo con los tornillos cónicos [20] que se suministran.
- 1.8 Ensartar el conjunto así montado en el perno, montar el casquete de cobertura [10], pasar la arandela perforada [11] por la clavija [8] encastrándola también en el casquete [10], cerrar los perfiles y proceder a bloquear el conjunto con el tornillo [21]; montar las cabezas plásticas [13] en los perfiles [1] y [2].
- 1.9 (Tav. 426) En la hoja fija, por el lado de la zona de paso, montar los topes [30], el microinterruptor de proximidad [26] y los encajes [24] y [25] para el topo de la hoja móvil con los tornillos que se suministran.
- 1.10 (Tav. 426) Unir el marco periférico con los estribos [23] y los tornillos que se suministran y fijar los encajes superiores [22] de la hoja fija.
- 1.11 (Tav. 426) Insertar el magneto [28] en el encaje superior [22] de la hoja fija, en proximidad con la zona de paso.
- 1.12 Montar las bisagras [27] en la hoja fija y en el perfil vertical del marco periférico. *Prestar atención al sentido de desfonde.*
- 1.13 Fijar al suelo el encaje inferior [29] de la hoja fija con los tornillos que se suministran.

2. FIJACION DE GUIAS AL SUELO (tav. 421)

- 2.1 Cortar a la medida la guía [15] como se indica en las listas de corte. Fijar la guía [15] y las cabezas [14] directamente al suelo por toda la longitud de la carrera de abertura de la hoja, por delante del marco fijo.

3. EQUIPO CERRADURA (tav. 429)

Es posible instalar en el perfil cerradura de llave para el bloqueo del marco completo (función noche).

 *Atención: para garantizar la seguridad de funcionamiento se deberá instalar la varilla de bloqueo de la puerta inferior (no suministrado por nosotros) tal como se indica en la pieza de la Tav. 429.*

4. CONEXIONES ELECTRICAS DEL SISTEMA AST

Ver el manual de instalación IP1628 - AST/ASME/ASMI.

1. MONTAGEM DO SISTEMA DE ABERTURA AST

- 1.1 (Tab. 422) Em base ao sentido de abertura e ao comprimento LM da folha, cortar a medida os perfis [1] e [2] como indicado nas listas de corte.
- 1.2 (Tab. 426) Montar os elementos de parada [30] da folha fixa.
- 1.3 (Tab. 423) Passar o pino [4] no furo do prato [3] e bloquear o acoplamento com a tomada [17] introduzida até no prato [3]; colocar na sede a tomada 8 e montar o cabeçote com o parafuso [18] no prato [3].
- 1.4 (Tab. 424) Enfiar o pino [4] assim montado no perfil [2] e fixar tudo na folha com os parafusos [31] e [19] fornecida pela fábrica. *Atenção ao sentido de abertura.*
- 1.5 (Tab. 424) Montar o trinco [7] e passá-lo no perfil [2]; (tab. 421) a força de abertura da folha se regula deslocando o trinco [7] longo o perfil [2] e comprimindo a mola agindo no adequado parafuso hexagonal encaixado de 4 mm.
- 1.6 (Tab. 422) Montar o pino inferior [6] na folha com os parafusos [16].
- 1.7 (Tab. 425) Passar o perfil [1] no braço [5] e fixá-lo com os parafusos hexagonais [20] fornecidos pela fábrica.
- 1.8 Enfiar tudo assim montado no pino [4], montar a calota de cobertura [10], passar a anilha furada [11] na tomada [8] encaixando-a também na calota [10], fechar os perfis e bloquear tudo com o parafuso [21]; montar os cabeçotes de plástico [12] e [13] nos perfis [1] e [2].
- 1.9 (Tab. 426) Na folha fixa, do lado do vão de passagem, montar com os parafusos fornecidos pela fábrica os elementos de parada [30], o micro interruptor de proximidade [26] e as inserções [24] e [25] para a batida da folha móvel.
- 1.10 (Tab. 426) Unir a moldura perimetral com os estribos [23] e os parafusos fornecidos pela fábrica e fixá-los nos batentes superiores [22] da folha fixa.
- 1.11 (Tab. 426) Introduzir o imã [28] no batente superior [22] da folha fixa, em proximidade do vão de passagem.
- 1.12 Montar na folha fixa e no perfil vertical da moldura perimetral as dobradiças [27]. *Atenção ao sentido de abertura.*
- 1.13 Fixar a pavimento o batente inferior [29] da folha fixa com os parafusos fornecidos pela fábrica.

2. FIXAÇÃO DAS GUIAS A PAVIMENTO (tab. 421)

- 2.1 Cortar adequadamente a guia [15] como indicado nas listas de corte. Fixar a guia [15] e os cabeçotes [14] directamente no pavimento longo todo o curso em abertura da folha, de frente a serralharia fixa.

3. KIT DA FECHADURA (tab. 429)

É possível instalar no perfil a fechadura a chave para o bloqueio da serralharia completa (função noite).

 *Atenção: para garantir a segurança de funcionamento, deve ser instalada a haste de bloqueio da folha inferior (não de nosso fornecimento) como indicado no particular da Tab. 429.*

4. LIGAÇÕES ELÉCTRICAS DO SISTEMA AST

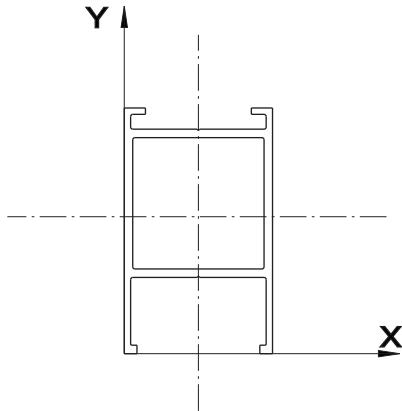

Vide o manual de instalação IP1628 - AST/ASME/ASMI.

Art. 1590

Art. 1591

$$\begin{aligned} X_g &= 17.5 \text{ mm} \\ Y_g &= -53.4341 \text{ mm} \\ I_{xx} &= 593026 \text{ mm}^4 \\ I_{yy} &= 122527 \text{ mm}^4 \end{aligned}$$

$$\begin{aligned} X_g &= 17.5 \text{ mm} \\ Y_g &= 32.3313 \text{ mm} \\ I_{xx} &= 102179 \text{ mm}^4 \\ I_{yy} &= 71019.6 \text{ mm}^4 \end{aligned}$$

Profili serie Pam35

Le prove effettuate in laboratorio ed in sede d'opera conducono ad una portata massima dell'anta di 130 kg.

Per una verifica strutturale più accurata, verificare i momenti di inerzia per profili portanti (Dis. n° 1590 e 1591) e le tipologie di installazione indicate nel presente manuale.

Pam35 profiles

Laboratory and field tests have shown maximum wing load capacity to be 130 kg.

For a more accurate determination of structural resistance, check the moments of inertia of the load bearing sections (Dis. n° 1590 and 1591) and installation types as specified in the present manual.

Profils serie Pam35

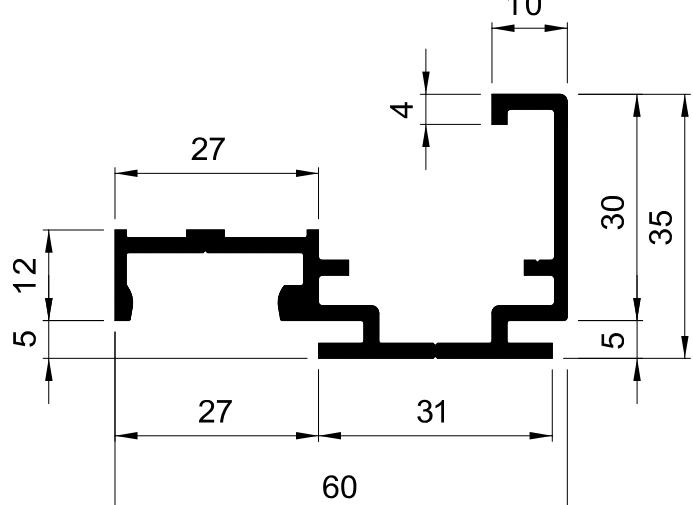

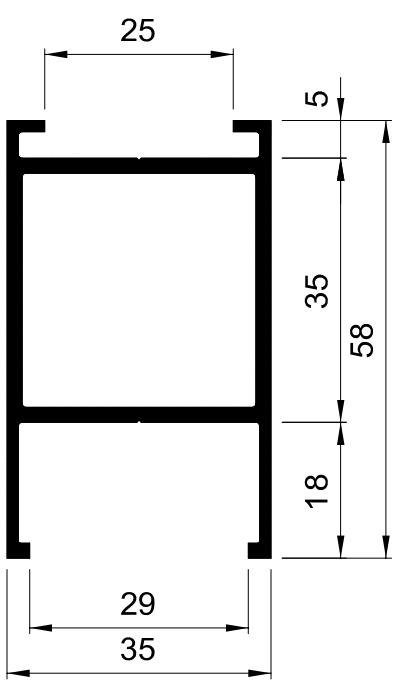

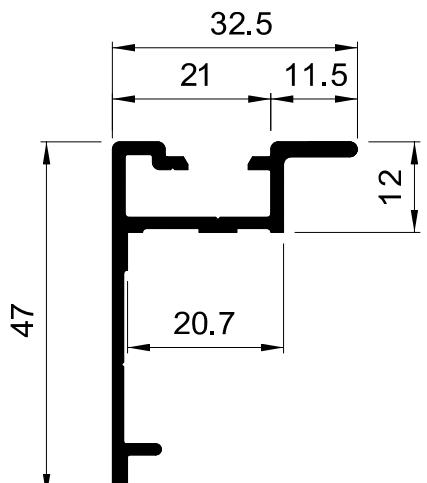

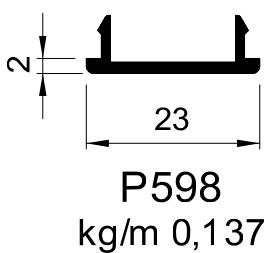

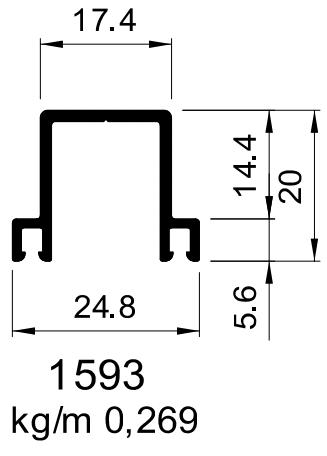

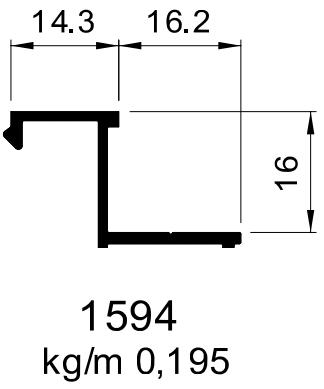

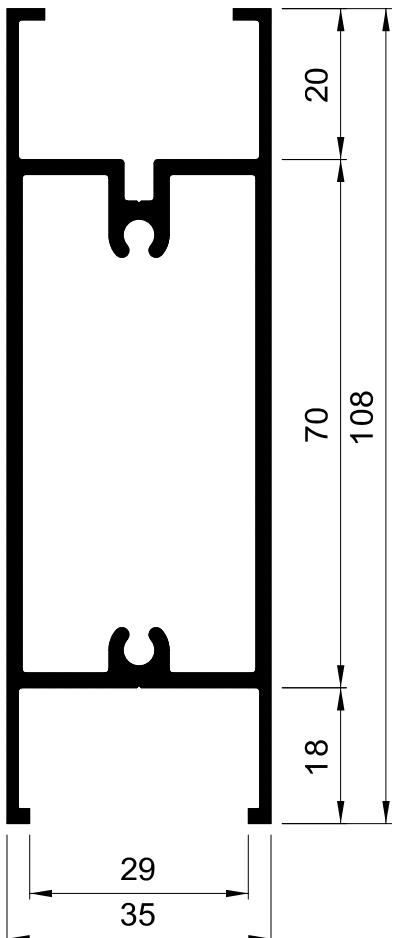

Les tests effectués en laboratoire et lors de la mise en oeuvre conduisent à un poids maximum du vantail de 130 kg. Pour vérifier la structure d'une façon plus précise, contrôler les moments d'inertie des profils portants (Dis. n° 1590 et n° 1591) et les types d'installation indiqués dans le présent manuel.

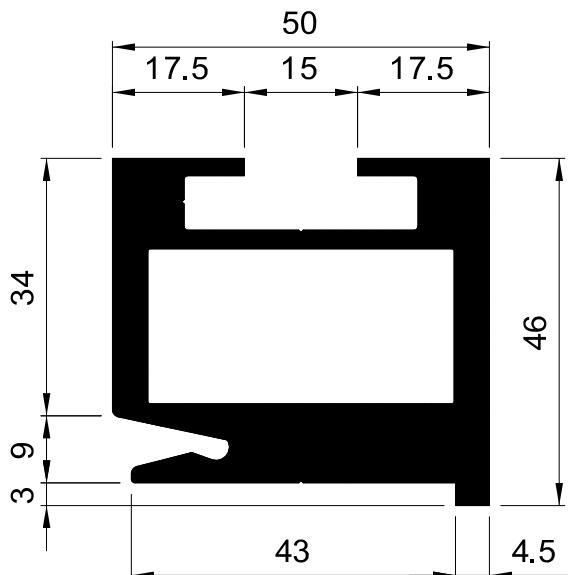

Pam35 Profilen

Die im Labor und vor Ort durchgeführten Versuche ergeben eine maximale Flügel der Tür von 130 kg. Um eine genauere strukturelle Überprüfung durchzuführen, müssen die Massenträgheitsmomente der tragenden Profile (Dis. Nr. 1590 und 1591) und die Art der Installation geprüft werden, die im vorliegenden Handbuch beschrieben wird.

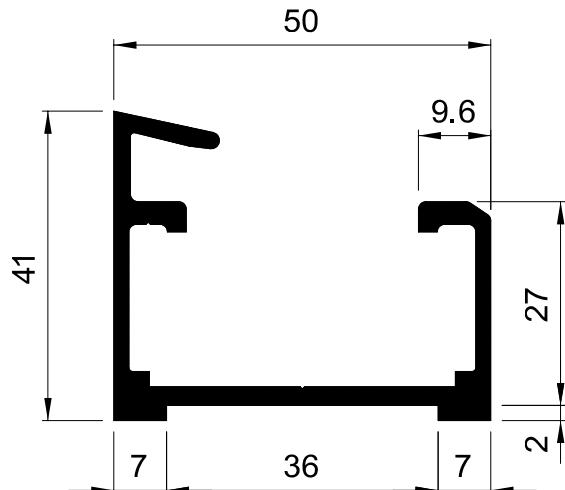

Profiles serie Pam35

Las pruebas efectuadas en laboratorio y su puesta en práctica conducen a un peso máximo de la hoja de 130 kg. Para verificar la estructura de una manera más precisa controlar los momentos de inercia de los perfiles portantes (Dis. n° 1590 y 1591) y los tipos de instalación indicados en el presente manual.

DITEC S.p.A. | PAM35-AST | Tavola: 404 - DT Scala:

In luce - Within doorway - En tunnel
Im lichten Durchgang - En luz

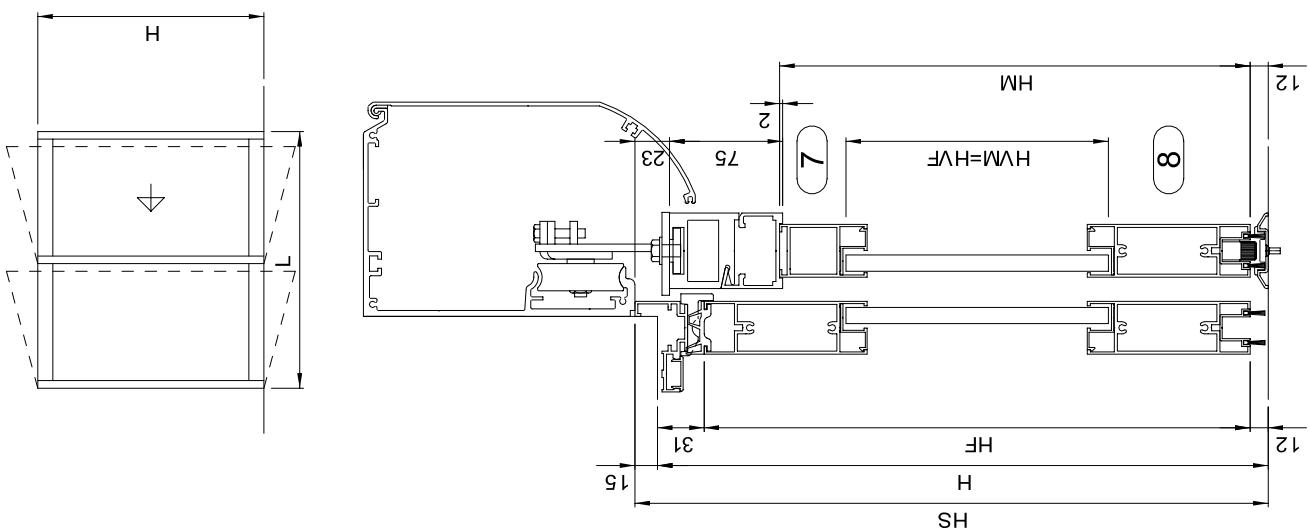

The technical drawing illustrates a door assembly with various dimensions and internal features:

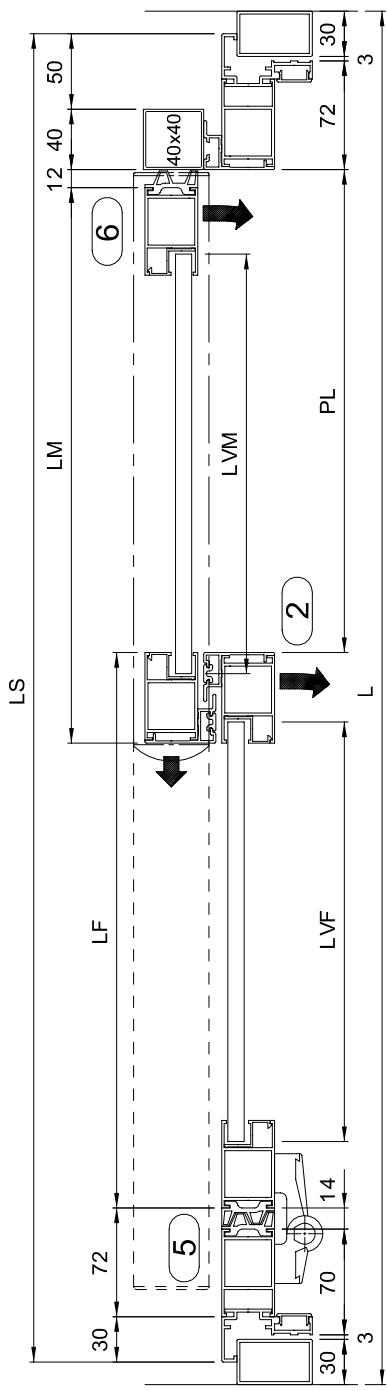

- Left View:** Shows a front view of the door with dimensions H (height) and L (width).
- Right View:** Shows a side view of the door frame with dimensions 12 (width), 12 (height), and 31 (depth).
- Bottom View:** Shows a cross-sectional view of the door assembly with the following dimensions:
 - Width: HM
 - Height: H
 - Thickness: 2
 - Width of the central panel: 75
 - Width of the left panel: 23
 - Width of the right panel: 15
 - Depth: HF
- Internal Components:** The drawing shows the internal locking mechanism, including a lock body, a handle, and a key cylinder.
- Labels:** The label "HVM=HF" is located near the top of the central panel, and the number "8" is located on the right side of the door frame.

Im lichten Durchgang - En luz

DITEC S.p.A. PAM35-AST Tavola: 405-BIS V Scala: 1:5

In luce - Within doorway - En tunnel
Im lichten Durchgang - En luz

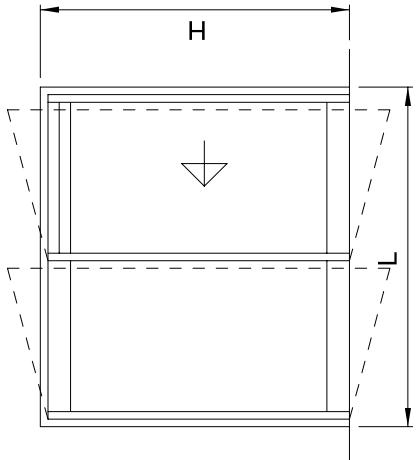

The technical drawing illustrates a double door system with the following dimensions and features:

- Left Door:** Total height **H**, total width **12**.
- Right Door:** Total height **H**, total width **12**.
- Door Panels:** Each door has two panels. The top panel height is **HM** and the bottom panel height is **HF**. The gap between the panels is **2**.
- Door Handles:** Both doors feature handles labeled with the letter **L**.
- Door Closers:** Each door is equipped with a closer labeled with the letter **C**.
- Bottom Seal:** A continuous seal at the bottom of each door is labeled with the letter **S**.
- Door Frame:** The frame height is **15** and the gap from the floor to the bottom of the frame is **31**.
- Left Panel:** The left panel of the right door is labeled **HVM=HVF**.
