OPEN YOUR WORLD

The external
door for intense
traffic

Ditec
TRAFFIC C/CM

The Ditec Traffic C is a robust fold-up door, ideal for external applications.
The Traffic CM is suitable for larger dimensions.

IMPROVED WORKING CONDITIONS

Optimized process flow

The 400V motor, combined with counterweights, allows the door to open and close fast. With the INVERTERmotion, speed can be differentiated and increased up to 1.3 m/s.

Energy savings

The high operating speed avoids the doors remaining open longer than needed. Thus, the working environment remains stable and energy can be saved.

Wind resistance

Thanks to the reinforcement bars in the curtain, the Ditec Traffic C/CM withstands wind loads up to class 2. The fold-up principle makes sure doors can close even under heavy wind load.

SAFETY ASSURED

Protection of people & goods

The self-testing, sensible bottom edge and the photocells or a light curtain detect possible obstacles and reopen the door when needed.

Emergency opening

In case of emergency, a red handle can be turned to release the counterweight and open the door.

SMART & NICE DESIGN

Italian looks

A Ditec Traffic C/CM door has a nicely finished doorframe. On the Traffic C, fully transparent sections are available for maximum visibility.

Low maintenance

The Ditec Traffic C/CM, with its most accessible operating system, requires little maintenance.

Space saving

The Ditec Traffic C/CM requires limited installation space. Its self-supporting frame and the absence of a side-motor allows for installation in a corridor or any other limited space.

Horizontal reinforcement bars

Emergency opening

Modular sections
